DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in–

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

1. Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Nevitt et al. (US6268961B1).

Regard to claim 1, Nevitt et al. teach (Figs. 5 and 7) an optical laminated body comprising:

- a polarizing layer 122/124
- a first transparent film 128 disposed closely to a front surface of the polarizing layer,
- a second transparent film 128 disposed closely to a back surface of the polarizing layer,

an optical laminated body characterized in that the polarizing layer comprises a reflective polarizing film 122/124, and both of the first transparent film and the second transparent film are diffusive films 128.

Regard to claim 2 and 3, Nevitt et al. teach (Figs. 8 col. 15 line 36 to col. 16 line 18) a lighting device for illuminating an optical body, characterized in that the lighting equipment comprises

- an optical laminated body as described above with the fifth and seventh embodiments
- a surface light source 216 supplying light to the optical laminated body through a light entry surface of the first transparent film,

wherein

- the light illuminating the optical body is diffuse polarized light emitted from a light emitting surface of the second transparent film of the laminated body;
- there is no diffusive plate disposed between the lighting device and the illuminating body 204.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:

- Epstein et al. (US6357880B2) disclose a display apparatus with corrosion-resistant light directing film.
- Okumura (US6008871A) discloses a transfective liquid crystal display device having a reflective polarizer.
- Broer et al. (US6359670B1) disclose liquid-crystal display device with diffusing layer on reflective polarizer.
